## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on 7/25/2003 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tedesco, R., "Buying air time online," Broadcasting & Cable, 28 February 2000 and in view of ordinary business practice

Tedesco suggests several information presentation systems which inserts presented data of a data presentation client (see page to para 6)

An information presentation system which inserts presented data of a data presentation client into provided data which a service provider provides, and presents the presented data, the information presentation system comprising:

data presenting condition transmitting means for transmitting data presenting conditions by the data presentation client (see full article);

Art Unit: 3693

data presenting condition acquiring means for acquiring data presenting conditions from the data presentation client in a prior period which is before a providing period of the provided data by the service provider starts (see full article);

data presenting condition determining means for determining data presenting conditions on the basis of a reference which is set in advance from the data presenting conditions acquired from the data presenting condition acquiring means, after the prior period passes (see full article);

notifying means for reporting notification data corresponding to the data presenting conditions determined by the data presenting condition determining means (programming posted online, see para., 7); and

providing means for providing the presented data by inserting the presented data into the provided data on the basis of the notification data from the notifying means (programming posted online, see para., 7).

Tedesco fails to disclose data presenting conditions corresponding to maximum price among bid price. However, since Tedesco talks about interactive bidding online, it would be obvious from auctioning practices that there would be an upper and lower price boundary. Thus to provide data presenting conditions corresponding to a maximum price would be within the realm of what someone of ordinary skill at the time of the invention would expect. Thus such a modification would be an obvious expedient to one of ordinary skill in the art.
